

Lillington Nursery and Primary School

Head Teacher to Home – 23rd March What has happened in school this week?

Wow! It was amazing to see so many parents and carers at yesterday's maths open day. The children really enjoyed sharing some of their maths experiences with family members and it was brilliant to see parents engaging with the maths games and challenges.

Huge thanks to Mr Pegg for all his efforts organising the afternoon.

The children have all taken part in British Science Week activities throughout the week (it was actually last week but we were too busy). Each class has tried to beat the world record – 4m 26cm – for stretching a Cadbury's Curly Wurly.

Alongside the fun, they've planned scientific enquiries, made predictions, recorded their findings and written conclusions. Thanks to Miss Bailey for organising all the activities. The winners of the science competition were Simas (Yr 1) and Dominic (Maple). Well done to everyone who put in an entry.

Next week we have our parent consultation meetings. These are a great chance for you to talk to your child's class teacher about what your child is doing well and what they can do to further improve their learning. Follow the link in the texts/emails you've received if you haven't already booked a time slot.

On Tuesday, we have our Easter church services at St Mary Magdelene's Church. The services will include some Easter stories, singing and an Easter Egg Hunt around the church's grounds.

Our assemblies this week have focused on individual liberty. The children learned that individual liberty is one of the British Values and it means they have the freedom to choose who they play with, what they eat, what they talk about etc. They also learned that although they have freedom, they must follow rules that exist to help keep everyone safe.

Enjoy your weekend and see you all on Monday.

Pankhurst had a great time trying to beat a world record this week. We planned our investigation, decided on the variables, made our predictions and then had fun investigating. The children then made a bar chart to show their findings.

What has happened in school this week?

As part of Science Week, the children in Angelou have been investigating the ‘stretchability’ of Curly Wurly bars!

After making their predictions, informed by scientific reasoning ability, they discussed and established variables which would likely enable their Curly Wurly to stretch the farthest. The children worked superbly in teams, produced high-quality scientific write ups and – more importantly –

HAD FUN!

King Class have been taking part in British Science Week activities. They tried to break the world record for stretching a Cadbury's Curly Wurly. They didn't quite manage it but did learn about scientific enquiries along the way. As part of the process, the children had to plan, predict, record and present results in graphs and make concluding comments.
